Introduction & Qualification Certificate

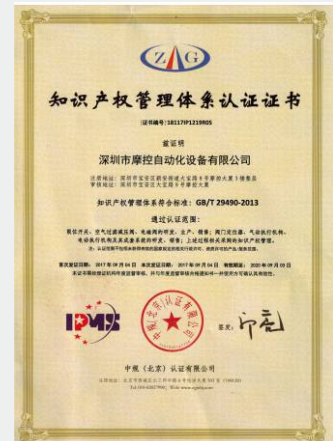

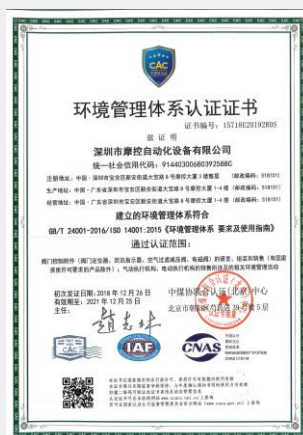

Introduction

MORC Controls Ltd. was established in October 2008, as Chinese High Technology and New Technology Enterprise and it mainly engaged in the research, development ,production and sales of valve accessories. The company has gained ISO9001 quality management system and ISO14001 environmental management system certification, and successfully joined the HART Communications Foundation. The products have obtained CE, ATEX, NEPSI, SIL3 ,3C as well as other quality and safety certificates. In June 2022, Our branch company Anhui MORC Technology Co., Ltd. was officially put into production, with a total area of more than 10,000 square meters, where is the main production base of MORC.

MORC product range involves in valve positioner, solenoid valve, limit switch, air filter regulator and Pneumatic /Electric Actuator, which are widely used in petrochemical, natural gas, metallurgy, power, new energy, paper-making, foodstuff, pharmaceutical, water treat-ment industries, aerospace industry, shipping and so on. We are also capable of providing complete set of control valve and on-off valve solution as we have a very close relationship with valve manufacturer.

With the rapid development of industrialization, automation and intelligence in the world, MORC will adhere to the development philosophy of "quality first, technology first, continuous improvement, customer satisfaction", provide customers with better products and services, and build MORC into world's leading valve accessories brand.

Qualification Certificate

History

2022.09	The company has successfully passed the examination of Sinopec Yipaike Commercial Credit Center and obtained the A-level credit evaluation certificate
2022.09	The company's solenoid valve, limit switch, Air Filter Regulator, Air Operated valve control valve Obtain the SIL 3 certificate issued by TUV
2022.06	2022.09 MORC branch company Anhui MORC Technology Co., Ltd. was officially put into production.
2021.12	The company was awarded the second prize of science and technology Progress issued by China Society of Automation
2021.12	The company's intelligent valve locator won the 23rd Hi-tech Fair excellent Product award
2021.11	The company and universities have established an industry-university-research cooperation and innovation base
2021.06	The company was awarded the first batch of Shenzhen specialized and special new small and medium-sized enterprises
2020.12	Obtained the Explosion proof 3C certification for related products.
2020.11	Joined the HART Communications Foundation and became a member of it.
2020.04	Continue to obtain the National and Shenzhen high-tech enterprise qualification certificate.
2020.03	Through the acceptance of Shenzhen's special fund project for future industrial development.
2019.01	Obtained ISO9001:2015 Quality Management System Certificate
2018.12	Obtained ISO14001:2015 Environmental Management System Certificate
2017.08	Opening of the design and testing laboratory
2017.06	Certified SIL3 for Solenoid Valves & Limit Switch Box
2016.07	Obtained the National and Shenzhen high-tech enterprise qualification certificate
2016.07	Special funding provided by Shenzhen future industry development
2015.12	Obtained ISO 9001:2008 quality management system certification
2015.09	Moved to a newer and bigger MORC building
2014.07	Obtained air filter regulator and solenoid valve invention patent and software patent
2014.04	Obtained CE certification for all range of products
2012.06	Obtained Shenzhen innovative small and medium-sized company certification
2010.05	Implemented ERP management system
2008.10	Established Shenzhen Morc Controls Co., Ltd

MSP-25 Series is a control device that receives the 4~20mA output signal from the controller or control system, then transforms into the air pressure signal driving the pneumatic actuator to control the valve. Mainly used for valve position control of pneumatic linear or rotary valves.

- Use piezoelectric valve electric pneumatic conversion structure.
- Suitable for hazardous area by intrinsically safe electronics.
- Easy to install and auto-calibration.
- LCD display and on board button operation.
- Fail safe function under loss of power, loss of air supply and loss of control signal.

Model No.	MSP-25
Input signal	4~20mA DC
Supply pressure	0.14~0.7MPa(20~105psi)
Stroke	Linear 10~150mm(standard);5~130mm(adaptor)
	Rotary 0~90°
Impedance	450Ω(without HART) , 500Ω(with HART)
Air connection	NPT1/4
Gauge connection	NPT1/8
Power connection	G1/2, NPT1/2, M20*1.5
Repeatability	±0.5%F.S.
Ambient temp.	Normal:-20~80°C; low: -40~80°C
Explosive temp.	-40~60°C
Linearity	±0.5%F.S.
Hysteresis	±0.5%F.S.
Sensitivity	±0.5%F.S.
Flow rate	Fully open : 130L/min(@6.0bar)
Air consumption	Stable condition : <0.0006Nm³/h
Output characteristics	Linear (default); Quick open; Equal percentage ; User defined
Shell material	Aluminum or SS316L
Ingress protection	IP66
Explosion-proof	Ex ia IIC T6 Ga; Ex ia IIIC T135°C Db
Weight	Aluminum:2.3kg; SS316L: 4.6kg

PTM: positioner transmitting module; L/S: limit switch.

MSP-25 series Smart Valve Positioner is a control device that receives 4 ~ 20 mA command signal output from controller or control system and output air pressure signal to drive pneumatic actuator to control valve opening. This model is a split remote transmission structure, sensor and body separation, suitable for high temperature and space limited installation environment.

- Use piezoelectric valve electric / pneumatic conversion structure.
- Suitable for hazardous area by intrinsically safe electronics.
- Easy to install and auto-calibration.
- LCD display and on board button operation.
- Fail safe function under loss of power, loss of air supply and loss of control signal.

MEP-10L Electro-pneumatic positioner delivers fast and accurate positioner used and general purpose. Long life service assured by robust and simple design, delivering maximum reliability in all environments while maintaining precise, accurate positioning of the control element.

- Use mechanical nozzle baffle structure
- High vibration resistance - no resonance between 5 to 200 Hz.
- Direct and reverse acting, single and double acting are interchangeable.
- Robust, simple and low maintenance design.
- 1/2 Split-range control can be achieved by changing the stroke spring.

MEP-12 series Pneumatic-pneumatic positioner

The MPP-12 series is a device that receives 0.02~0.1MPa signal from the controller or control system to control the valve.

- Use mechanical nozzle baffle structure
- High vibration resistance - no resonance between 5 to 200 Hz.
- Direct and reverse acting, single and double acting are interchangeable.
- Robust, simple and low maintenance design.
- 1/2 Split-range control can be achieved by changing the stroke spring

MC51 Series 3/2 Explosion-proof Direct Action Solenoid 1/4"

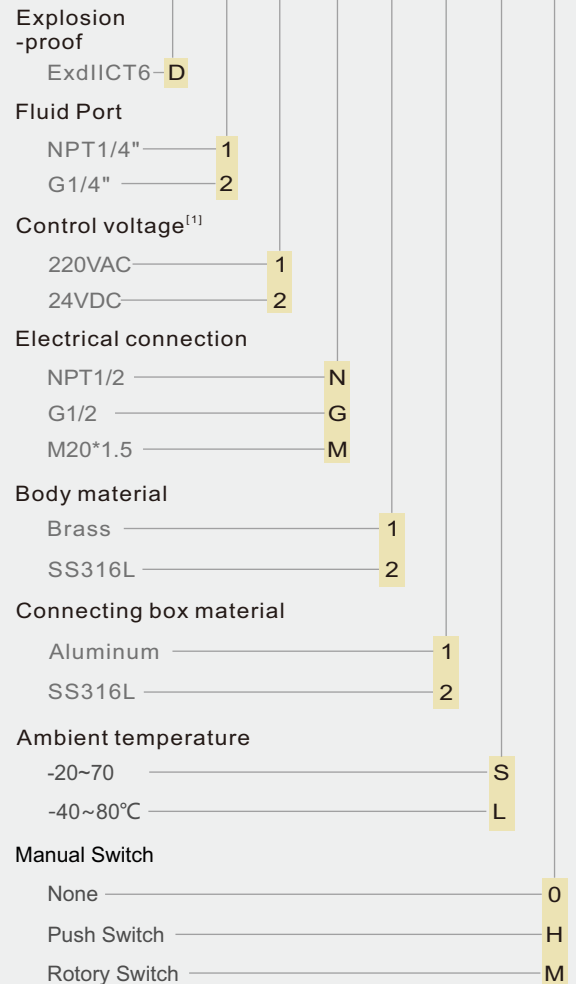

- Used for single acting actuator control, wide working pressure range, no minimum operating pressure difference.
- PTFE rider rings and graphite-filled PTFE seals reduce friction and eliminate sticking.
- Coils used in metal enclosures have class F insulation materials.
- Low-power design.
- Normally open and normally closed is universal.

Model No.	MC51
Voltage	DC : 24V ; AC : 220V
Power Consumption	24VDC: 3.6W ; 220VAC : 5.5VA
Insulation class	F Class
Working medium	Air, Inert gas, Water, Light oil
Differential pressure	0~1.0MPa
Fluid Port	G1/4, NPT1/4
Electrical connection	NPT1/2 , M20*1.5 , G1/2
Ambient Temp.	-20~70°C/-40~80°C
Explosion-proof	Ex db IIC T6 Gb ; Ex tb IIIC T85°C Db
Ingress protection	IP67
Installation	Tubing
Flow rate	7.5LPM
Body material	Brass or 316L

[1]The default AC voltage is 220VAC and DC voltage is 24VDC. For other voltages, Please consult MORC for additional voltages.

MC-22 series air filter regulator able to accurately control pressure, as well as filter solid particles above 5 microns, and liquids from compressed air. Provide clean air source for air receiving equipment.

- Die-cast aluminum body material with a polyester coating, which gives a long life and protects against corrosion. SS316L material is optional, suitable for severe corrosive environment.
- Quick response, stable pressure output even when inlet pressure and flow fluctuate.
- Filter solid particles with a minimum diameter of 5 microns and self-cleaning function.
- Designed with 3 air outlets, installation direction can be easily adjusted.
- Manual or auto drain function is available.

Manual drain

Auto drain

Model No.	MC-22	
Max. input pressure	1.5MPa	
Output pressure	0~1.0MPa ^[1]	
Working medium	Compressed air	
Ambient temp.	-20~70°C ; -20~120°C ; -40~70°C	
Min. filtering size	5µm	
Air connection	NPT1/4 ; G1/4	
Body material	Die-cast Aluminum ; SS316L	
Weight	Aluminum	Manual drain: 0.6kg; Auto drain: 0.65kg;
	SS316	Manual drain: 1.95kg

[1]: The pressure gauge range is 0~1.0 MPa, for other specifications please consult MORC .

MLS100 series limit switch box have a proven track record for accurate and reliable signaling in linear and rotary applications. Providing both visual and remote electrical position indications, these cost-effective, compact unit unparalleled performance with ease of installation and calibration.

- Lightweight, dome shaped visual indicator with contrast color design.
- Rotary position indicator with NAMUR standard.
- Anti-detachment bolt, it will never missed during disassembly..
- Two cable entries for easy installation.
- IP67 and UV resistance, suitable for outdoor use.

Model No.	MLS100
Body material	Die-cast Aluminum
Outer coating	Polyester coating
Power connection	M20*1.5, NPT1/2, or G1/2
Ingress protection	IP67
Stroke	90°
Switch type	Mechanical switch or proximity switch
Mechanical switch rating	16A 125VAC/250VAC , 0.6A 125VDC , 10A 30VDC
Proximity switch rating	Intrinsically safe : 8VDC , NC Non-explosion proof: 10~30VDC, ≤150mA
Reed proximity switch rating	24V 0.3A
Ambient temp.	-20~70°C, -20~120°C, or -40~80°C

MC-30/31/32 Volume Booster

MC-30/31/32 series booster the valve function's reaction speed by providing large air flow rate to actuator.

- Improves speed of valve movement.
- Improves stability with by-pass control.
- Reacts to sudden change in supply pressure.
- Fixed deadband due to the seat-to-seat type of supply and exhaust pressure.

Model No.	MC-30	MC-31	MC-32

MC-60 series air operated valve is a device to control the on-off or change of the main valve gas channel through the on-off of the pilot pressure. Its characteristics:

- Pilot-operated type;
- Sliding spool valve with good seal and fast response.
- Low starting pressure, long lifespan.
- Manual override.

Control connection	G1/8
Working Pressure	1.5~8.0bar
Max Operating Pressure	12bar
Life Time	More than 10million times in normal use
Maximum operating frequency	5 times/second
Response Time	0.05S
Ambient Temp.	Normal Temp: -20~70°C, High Temp: -20~120°C : Low Temp: -40~70°C

Acting type

- Single Act — 1
- Double Act — 2

Body type

- 3/2 — 1
- 5/2 — 2

Installation

- NAMUR — 1
- Tubing — 2

Port connection^[1]

- 1/8" — 1
- 1/4" — 2
- 3/8" — 3
- 1/2" — 4
- 3/4" — 5
- 1" — 6

Ambient temperature

- 20~70°C — 1
- 20~120°C — 2
- 40~70°C — 3

Body material

- Aluminum — 1
- SS316L — 2

[1]The maximum diameter of SS316L is 1/2".

MTR-11 Series Position Transmitter

MTR-11 series position transmitter senses mechanical position change of stem being on the valve or similar device and converses to current signal of DC4~20mA output.

- Convenient wiring: 2 wire type.
- High accuracy and reliability.
- Simple change for RA v.s. DA action setting.
- Convenient adjustment of zero and span.

Model No.		MTR-11
Input Stroke	Linear	10~150mm
	Rotary	0~90°
Output signal		4~20mADC
Load resistance		Max.880Ω/28VDC
Supply voltage		9~28VDC
Scope of noise		50mV p.p
Power connection		PF3/4(G3/4)
Linearity		±1%F. S.
Hysteresis		±0.2%F.S.
Sensitivity		±0.2%F.S.
Ambient temp.		-20~70°C
Explosion-proof		ExdIICT6
Ingress protection		IP67
Shell material		Aluminum
weight		1.2kg

Service

MORC offers safety, reliability and performance products to our customers. We offer comprehensive services to meet customer demand, which includes pre-sale, after-sale technical support service and field service as well as providing complete valve assembly service.

MORC series cover from assisting on product selection to all stages of the life cycle of our product. It includes simple troubleshooting as well as comprehensive service for entire projects. Our products are designed to perform reliably in many industrial environments. We strive to provide the services our customers need to ensure the plants running smoothly without any disruption. Upgrading and replacement of existing product can be a cost-effective alternative to premier brand product. We assist our customers in modernizing existing installations and replacing the old/obsolete products to minimize cost for customers.

Control Valve Complete Service

MORC has partnered with number of leading valve manufacturer to provide complete valve assembly and calibration service. According to customer requirement, such as valve parts selection, assembly and commissioning of pneumatic control valve, pneumatic on-off valve or electric control valve.

- **Pneumatic regulating valve or proportional control valve**
Pneumatic control valve or proportional control valve is composed of pneumatic valve ,valve positioner, air filter regulator and other accessories to achieve control of valve opening degree.
- **Pneumatic on-off valve**
Pneumatic on-off valve is composed of pneumatic valve , pneumatic actuator, solenoid valve, limit switch, air filter regulator and other accessories to achieve fully open and fully close of valve.
- **Electric control valve**
Electric control valve is a complete set of control valve composed of electric actuator and valve. According to different valve types, such as 90 ° rotary valve, multi-turn valve and linear valve, it can be equipped with rotary electric actuator, multi-turn electric actuator or linear electric actuators for switching or adjustment functions.

Custom labels

We make custom labels for customers who buy in large quantities.

Nameplates

Within in house tag design and CNC engraving machines, we can engrave custom nameplates any information specified by customer.

Product Support Service

With more and more MORC products being used in various industries, product support service is vital to ensure the correct selection and implementation of products. If users have any questions, they can contact MORC or their supplier for consultation. Alternatively log onto the MORC company website for downloading supporting documents.

www.morc.com.cn

Pre-sale Service

- Control scheme and product selection.
- Technical consulting.
- Product introduction and technical maintenance training.

After-sale Service

- Installation, calibration and commissioning guidance, technical consultation.
- Phone call or video call remote assistance to solve the problem.
- Repair service, allowing users to send the faulty product to MORC for inspection and repair.
- Replacement parts and upgrade services. Under certain circumstances, MORC can provide spare parts/products to users for direct replacement, users then return faulty parts/products to MORC for repair and upgrade.
- Provide maintenance plan and spare parts plan.

On-site Service to help your operation runs smoothly

- On-site installation, calibration and commissioning training.
- Fault diagnostic and repair.
- Software and hardware upgrade services.

Production Service

- Spare parts and OEM solution.
- Inventory plan.
- Production schedule adjustment to meet customer needs
- Product quality inspection and function test.

On-sale Service.

- Priority support and fast response.
- Identify or replace for alternative solution.
- Provide maintenance advice.

Engineering Service

- Delivers value-added solutions that improve operational performance and increase profitability for its customers.
- Perform system audits to identify operational issues and recommended solutions.
- Engage remotely or on-site to support project planning and design.

Education and Training Service

MORC offers a wide range of education and training programs to help customer and user deepen their understanding of critical equipment and processes. User can submit their requirements and training content to company. MORC can design and deliver tailored training programs on site or in the office.

MORC Quality Assurance

- Quality is our foundation to long-term existence and success of our company. The quality of our products is the key to achieving customer satisfaction. By listening feedbacks from our customers, we are able to always learn and improve our service and product. Our full suit test equipments, and our product life cycle management ensure material quality for our suppliers, our products meet demand from industrial harsh environment.
- Quality also means all staff at MORC consider themselves responsible for the quality of our products and service. The continuous improvement process we are convinced that only satisfied customers will do business with us again.
- All MORC products come with warranty period of 18 months after arrival of goods 12 months after installation of product, whichever comes first.

MORC Social Responsibility

- The health and safety of MORC staffs is very important, we provide a safe working environment as well as a happy place to be. We also consider it important to contribute and engage positively in local communities and society.
- MORC is fully committed to reducing its impact on environment by preventing pollution, reducing the consumption of energy, water and waster and recycling.

Our vision

Be the world leading brand and successful valve accessories company.

Our Mission

Deliver superior service to our customer and pursue growth through improved and high-quality product; always strive to exceed our customers' expectations; manage our business with integrity.

General industry

Chemical

Oil & Gas

Pulp & Paper

Food & Pharmaceutical

HVAC & Water system

Petrochemical & Refining

Metals and Mining

MORC can supply not only reliable products to ensure extended service life, but experienced technical support and unmatched after sales service.
